10.16 District 16: Town Square	I believe that Town Square should be restricted to two stories and that regulatory relief should be granted for redevelopment/upgrade of properties in the Town square overlay. Particularly relief from housing requirements needs to be done. Two stories in the Town square do not lend themselves to affordable housing.	Bland Hoke Jr.	5/15/2009 17:24
10.16 District 16: Town Square	Honestly I don't think it matters. 2 or 3 stories? What is the difference really???	Kate Rohrstaff	5/15/2009 14:35
10.16 District 16: Town Square	This area must be bike and pedestrian friendly. It would be so beneficial to encourage a small grocery store to be located in the area so that town residents have easy access to everyday needs. I am a big fan of closing the town square to traffic, much like the centers of Boulder and Burlington.	Robin McGee	5/12/2009 11:32
10.16 District 16: Town Square	-Agree that building heights should not exceed 2 stories.	Save Historic Jackson Hole	5/15/2009 15:01
10.16 District 16: Town Square	I applaud the goals for the Town Square. But the tricky part will be implementation; we'll need tough standards that are mule strong, horse high and not subject to compromise. Witness the new building now being completed on the north end of Centre Street - a tall, red brick and glass monstrosity that blends in with the Town Square area about as well as a buffalo turd in a punchbowl. Our elected officials will need to learn to say no to developers if exacting standards for the Town Square are not fulfilled. They should practice in front of a mirror: "no, hell no, and by God we mean it". And let us forever strike from our lexicon the phrase "parking meters".	William D. Friend	4/20/2009 18:45
